Edition 17/1

High Performance Italian Exhausts with Quality, Character and Style!

SOLE UK DISTRIBUTOR

Triumph Scrambler
"Short System"

Ducati Scrambler Low Mounted Special Edition

The Zard exhaust brand was born in 2003 by a group of technicians with huge experience in motorcycle exhaust production. They are an Italian exhaust company with a difference. They produce high quality, high performance exhaust pipes then add in so much Italian style that the result is more like a hand made craft product!

The technical team are headed up by Valter Amista, a man who spent nearly 20 years as a senior technician with Termignoni, designing and creating systems for many customers around the world including the Ducati Corse group. Most of the Ducati Racing systems used in the world championships during those years will have felt the benefit of Valters skill and experience and the performance of Zard exhausts are competitive with all the major manufacturers of the world.

All this talent and experience is in demand in both racing and Original Equipment circles and Zard exhausts are used in the WSB, Moto 2 and Moto 3 world championships and are also fitted as original equipment by Bimota.

It is a young Italian company that are passionate about exhausts and exhaust design. After all, the exhaust is not just simple and static piece of metal, but an instrument that gives the voice, power and even soul to your bike.

So if you are tired of almost all exhaust pipes looking pretty much the same with just different names on them. If you want excellent performance, excellent quality and maniacal attention to detail with just a little bit more interest and style, perhaps it is time you took a look at Zard!

Put some beauty on your beast!

Pipercross Performance Air Filters

The PX range of Pipercross high performance air filters offers the ultimate in engine filtration, giving outstanding performance over the life of the filter compared with leading cotton gauze filters.

■ The PX range of Pipercross high performance air filters offers the ultimate in engine filtration, giving outstanding performance over the life of the filter compared with leading cotton gauze filters. This is made possible because of the unique filter material used. It is constructed from a multi-laminated layer of reticulated polyurethane foam lattice, impregnated with a dirt-retention additive.

■ This filter framework allows optimum airflow to the induction system, as well as absorbing dust particles in a sieving action. The layers of foam contain pores of differing sizes, with larger dust particles trapped in the outer layers, medium particles at the next layer and so on, through to a final layer that traps particles as small as five microns. Pleated cotton gauze filters, by comparison, have to be regularly cleaned to achieve the same life as a maintenance-free foam filter. This Means that although air flow and power results are often very similar when first fitted the Pipercross continues to flow more air than the cotton gauze filters once they start to get dirty.

■ Result, high power, often out performing competitive brands in tests and low maintenance.

■ Pipercross are one of the most successful filter manufactures and have won hundreds of championships including several World Rally Championships. Additionally they have been supplying OE filters to Triumph for about 10 years and are used and recommended by top race teams like Rizla Suzuki and Ducati.

Power Filters

Dyno and race proven filters to replace the original equipment item. Requires the retention of the original air box. Wherever possible these also increase the aperture size to ensure maximum air flow and maximum power!

Power Induction Kits

Sometimes the manufacturers work hard to optimise power and sometimes not! This can depend on many factors, such as target customers, intended use, noise legislation or omissions. Sometimes additional power is available with known modifications and the Power Induction Kit can help you get at it! As an example the SV1000 kit was tested as + 8BHP.

Power Conversions

Due to their amazing power outputs and light weight, many motorcycle engines are fitted to other types of vehicles, particularly racing cars and trikes. Pipercross Power Conversions are a great help when the original air box has been removed and probably the most popular filters available for this job. We have even had enquiries for Hayabusa engines for speed boats!

Power Race Filters

Developed from the Power Filterrange but utilizing an F1 type foam to develop maximum power for Race and Track bikes. This delivers excellent breathing and therefore power but requires more maintenance than the Power Filter range.

Available for most RR type bikes – please ask!

Power Cones

Individual power filters to replace the air box unit where it is restricting air flow or cannot be used for other reasons. Also, often an excellent choice for motorcycles where few other choices are available. Several new models currently under development.

Power Socks

Individual Power Socks can be used to replace the air box and clamp straight onto the back of the carburettor. They are soft as they are only constructed from air filter foam so are excellent for use in cramped and difficult situations. Priced individually.

Bike Torque Racing are UK distributors for all Pipercross motorcycle products

Standard engine covers are nice and light weight but break very easily when you fall off. Expensive engine damage is often the result from damaged crankshafts and gravel in the oil.

Fit some heavy-duty NRC aluminium engine covers before you fall off and save yourself a fortune. For track day and race use they are essential equipment!

Niagara Race Crafters or NRC is the worlds largest producer of heavy duty superbike engine covers, with more than thirty years experience in engine cover design and production. They have committed hundreds of thousands of dollars in design, investment moulds, tooling and state of the art CNC equipment to produce the finest heavy duty engine covers possible! They are produced to ISO 9002 quality control standards and are finished in a natural silver grey alloy with the NRC logo cast into the cover.

They are very different from the cheap plastic bolt on covers which are available but which offer very little additional protection to the OE cover. NRC believe in making a high quality durable product and we know of some riders who have crashed up to 20 times on NRC covers. We therefore remain confident of their overall economy and design benefits.

IN STOCK

Surflex are one of the foremost experts of motorcycle clutches in the world today.

Their production goes back more than sixty years and their clutches cover every aspect of motorcycling from the earliest Classic Bikes to the Slipper Clutches of modern race bikes. Their experience is second to none and their Original Equipment clutches are fitted by many of the European motorcycle producers as standard for their exceptional quality and strength.

Since the whole range of components, including all CNC machining and even the friction materials are produced in house, Surflex have complete control over quality.

Hi Torque Clutches

Their High Torque Performance clutches are bonded with high performance friction materials which are chosen according to the motorcycle requirements and use. These are asbestos free and contain Kevlar or Carbon fibres. The Hi Performance Friction Plate kits can be used with the OE plain plates and springs, whereas the Complete Plate kits are often modified from standard to improve clutch performance. This may mean a different plate profile, to improve the effective radius of the clutch, thinner plates, to allow additional plates to be included, thicker plates, to allow better heat dissipation or improved materials and finishing processes. The result, is top quality and high performance, often without the need for heavy-duty springs.

Slipper Clutches

Slipper clutches, or more specifically Anti Hop clutches, are a relatively new solution to the age old problem of severe engine braking locking the rear wheel when entering a corner. In the last few years, quality of many products available has suffered dramatically in an effort to be the cheapest rather than the best. Once again Surflex concentrate on quality first and foremost and their benefits include;

- ***Easy fitting***
- ***No maintenance required, even when working dry as all components are made with hardened alloy steel***
- ***No need for particular care, other than a periodic check of total disc pack thickness***
- ***Suits most riders requirements as set by the factory, but quick and easy adjustment if required***
- ***Comes complete with a clutch plate kit designed for the job rather than relying on Original Equipment parts which were not designed for Slipper clutch use***
- ***No Special tools required for adjustment***

This adds up to terrific quality and value for money and results in its market leading reputation.

Ducati Clutch Basket

CNC aluminium clutch basket which can be used with the Surflex slipper clutch. Lighter and stronger the original equipment unit. Can also be used to replace the heavy OE basket and can be used with all the OE parts. Fits most Ducati big twins.

SHIDO®

LITHIUM ION BATTERIES

A Battery Revolution!!

Take a look at most modern motorcycles and you will see that they are very different from the bikes manufactured 100 years ago. Just about every component has been improved, modernised and refined by research, development and technology. Except for one that is!

Yes, the humble battery is still almost exactly the same as it was nearly 100 years ago.

That is until now when Shido, a name with a reputation for quality batteries, have redefined it with their new ultra high tech Lithium Ion battery.

Light weight... No pollution... Safer... High performance... Easy fit

Up to 75% lighter than conventional batteries – With a weight saving of around 2kg on an average superbike, it is the cheapest and easiest weight saving you will make. Perfect for road, race & track! Lighter weight improves acceleration, braking, handling and even fuel consumption.

- Safer to you and kinder to the environment – much safer than conventional lead acid batteries since they contain no explosive gases, corrosive acids or toxic heavy metals.
- Long lasting and rapid charging – can accept more than 2000 charging cycles and can last up to 10 years. Will charge up to 75% in just 6 minutes.
- Superb cranking capacity – up to 50% more than lead acid batteries.
- Easy fit – unlike many others, the battery is the same size and shape as the OE battery so that it fits directly into the same space with the same electrical connectors and bolts. So no messing around and wire cutting to get it to fit.
- Their light weight gives them an obvious application for track & race bikes but their other benefits make them a must for all road bikes!

SHIDO lithium-ion Jumpstarter

The SHIDO lithium-ion Jumpstarter is an extremely powerful, yet lightweight solution if you are in need of a portable backup energy source.

You can use the jumpstarter to start your vehicle, power mobile applications, or recharge electronic devices such as smartphones or tablets on the move.

- **Low weight – Up to 80% lighter than equivalent lead acid jumpstarters**
- **Low volume – up to 80% smaller than equivalent lead acid jumpstarters**
- **Quick recharge capabilities – 5 times faster than equivalent lead acid jumpstarters**
- **Long shelf life – 24+ months**
- **Long cycle life – 2000+ cycles**
- **Safe – No corrosive acid inside. Can be stored anywhere in your car/van with no risk of leaking.**
- **Flexible – Different output ports for different voltages and applications.**

An excellent independent power source!!

These jumpstarters have multiple uses. You can jump start your bike, your car and the biggest of them will even start a truck if you need to. There are many uses for racers and track day riders in and around your race truck in the paddock.

Need to plug it in and start a bike that stalls of the starting grid? No problem and it weighs nothing too. Remember the days when we had sack trucks with car batteries on for that job? Not any more! Need a light in the van at night? Comes with a light fitted. Or, you can just use it to recharge your battery, lap timer, smart phone, tablet or lap top.

Terms and Conditions of Business

ORDERS
Orders can be telephoned, faxed, mailed, Emailed or collected from our premises at Unit 15, Handlemaker Road, Marston Trading Estate, Frome. Somerset. BA11 4RW.

VAT
All prices are subject to VAT where appropriate and carriage charges where relevant.

PRICES
Prices are correct at time of printing but may vary at any time without notification.

PAYMENT
We are able to accept payment by most Credit or Debit cards, PayPal, cheque with order, bankers draft, cash sent by registered post or postal orders. Please make cheques or postal orders payable to Bike Torque Racing Ltd. Account facilities are available for trade customers, subject to satisfactory references and certain conditions. Please request an account form.

RETURNS
Where mistakes have occurred we will accept most mail order parts for return, provided they are returned within 14 days of despatch. Special orders cannot be returned, refunded, exchanged, credited or cancelled under any circumstances. All other parts may be returned according to the following guidelines. Parts ordered incorrectly will incur a 20% restocking charge and carriage charges cannot be refunded. If the error is ours, returned parts will be refunded in full but please be aware it is entirely your responsibility to ask for the correct parts for the correct model. Parts that agree with the invoice are deemed to have been correctly supplied. All parts returned must arrive back with us not later than 2 weeks after the date of despatch and it is the senders responsibility to ensure that they are well enough packed to survive the rigours of the transport.

CARRIAGE CHARGES
Most parts are sent on Courier next day service at a cost of £6.95 for England & Wales, £20.00 to £25.00 for Scotland, Northern Ireland, Southern Ireland and Channel Islands. Shipping to these destinations may be slightly slower. Small items are sent by Post Office recorded delivery at £5.00. Large, heavy or export orders will be quoted separately. All carriage charges are subject to VAT and delivery times or dates cannot be guaranteed.

RACE EXHAUST SYSTEMS
All race exhausts systems and silencers are sold for RACE AND TRACK USE ONLY. They are illegal for use on British and many European roads and do not conform to MOT standards. We will not accept any liability whatsoever for their use on the highway. Only 'E' marked exhausts are legally useable on public highways. If you have unknowingly purchased a race exhaust, from us, which you intended to use on the public highway, please return it, in perfect condition, before any attempt has been made to fit it and we will be more than happy to exchange it for a road legal unit, subject to availability and adjusted cost.

STOCK AVAILABILITY
The words IN STOCK and RAPID DELIVERY used within our catalogues and internet site do not guarantee availability. In Stock is used for product ranges which we generally hold all or most of the items in stock most of the time but on occasions parts may not be available due to circumstances outside our control. Rapid Delivery is used where products can usually be delivered within 2-14 days.

RACING & TRACK RIDING
Warranty on any and all products sold by Bike Torque Racing Ltd is invalidated by their use in racing or track riding. All parts sold for use in racing are not warranted in any way.

RESPONSIBILITY FOR FITMENT
Some parts and products are supplied with technical specifications and fitting instructions and some not. It is most important that all persons or companies carrying out fitting work should read all such information and be competent and knowledgeable in the task they are undertaking. The fitting of some parts may necessitate the modification of other parts and/or the replacement or removal of other parts. It is the responsibility of the purchaser to ensure the correct parts are fitted and that any necessary modifications are carried out competently. If you are in any doubt please consult a professional mechanic or engineer. It is expressly your own responsibility to ensure that all parts are fitted correctly and that all safety measures have been taken. Always refer to the manufacturers workshop manual.

SAFETY
The use of any vehicle, including a motorcycle, whether on or off road involves some degree of risk of injury or death to yourself or others. You have a duty to ensure that your actions, or the result of your actions have no potentially adverse effect on safety. If all necessary steps are taken to follow safe working practices, it is possible to minimise the chance of an accident or damage which might otherwise occur as a direct result of parts or accessories having been fitted incorrectly, or the wrong or inappropriate part or accessory having been fitted. It is essential that you fulfil your own personal responsibilities to ensure the safe working and operation of your motorcycle.

RETENTION OF TITLE
Not withstanding delivery and the passing of risk in the goods, or any other provision of these Conditions, the legal and equitable property in the Goods shall not pass to the Buyer until the Seller has received in cash or cleared funds payment in full of the price of the goods and all other goods agreed to be sold by the Seller to the Buyer for which payment is then due together with any applicable taxes or duties thereon and interest for delayed payment if any outstanding amount due to the Seller by the Buyer.

Until such time as the property in the Goods passes to the Buyer:-

The Buyer shall hold the Goods as the Sellers fiduciary agent and bailee, and shall keep the Goods separate from those of the Buyer and third parties and properly stored, protected and insured and identified as the Sellers property., but the Buyer shall be entitled to resell or use the Goods in the ordinary course of its business provided that it shall account to the seller for the proceeds of sale up to the total amount outstanding in respect of any unpaid Goods; and (provided the Goods are still in existence and have not been resold), the Seller shall be entitled at any time to require the Buyer to deliver up the Goods to the Seller and, if the Buyer fails to do so forthwith, to enter upon any premises of the Buyer or any third party where the Goods are stored and repossess the Goods.

The Buyer shall not be entitled to pledge or in any way charge by way of security for any indebtedness any of the Goods which remain the property of the Seller, but if the Buyer does so all moneys owing by the Buyer to the seller shall (without prejudice to any other right or remedy of the Seller) forthwith become due and payable.

Nothing in these clauses shall preclude the Seller from taking action against the Buyer for the unpaid price of the Goods supplied.

FRAUD
Due entirely to the rise in credit card and mail order fraud. All orders must be sent to the credit card holder's address which is checked with the credit card company, except where the customer is already known to us. We apologise for any inconvenience this may cause and are sorry to have to have been forced into this position but the situation is not of our making. Any and all attempts at defrauding Bike Torque Racing Ltd will be prosecuted fully.
